

# PREDICT WHAT CAN GO WRONG

## Something you don't want to hear as you board the plane.

What's on your check list?  
Check for hazards *before* you start.  
Do it like your life is on the line.

**DON'T DO WORK YOU'RE NOT  
QUALIFIED & AUTHORIZED TO DO**

**Are you a licensed electrician?  
If not, don't fool with the wiring!**

# STOP UNSAFE ACTIONS

EVERYBODY MAKES MISTAKES.  
WATCH OUT FOR EACH OTHER

# GO HOME THE SAME WAY YOU CAME TO WORK

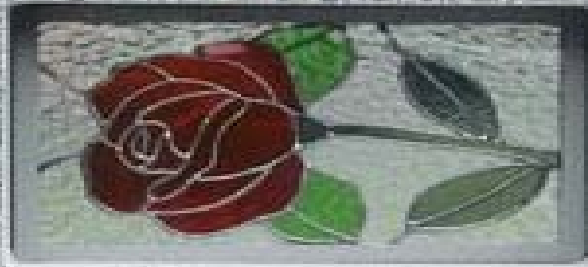

You don't  
want to see  
this when you  
go home.

Your family  
doesn't want  
to see you  
come home  
bandaged up  
either.

Nothing *Company Name* sells or does is  
worth getting injured for.

# NO EXCUSES NO SAFETY SHORTCUTS

"It'll only take a second."

"We've always done it this way."

"Everyone else does it."

"The equipment is too far away."

"It won't get me this time."

"I had the right of way."

## NO FAMOUS LAST WORDS
